**Brief Summary of Unit**: This unit is designed to be taught near the beginning of the year. In this unit, students will explore what it takes to learn another language. At the end of the unit students will have a better understanding of the repetition and practice it takes to learn another language. They will also have built up their presentational speaking skills by leading the beginning of class at least once. They will need to present to the class a greeting, information about the date, the time, the weather, the season, birthdays (including the likes/dislikes of the birthday person), and the questions of the week.

Stage 3: Learning Activities

Before this unit begins- For this unit to be successful the bienvenida should be a part of the daily routine in class from almost the beginning of the year. Even if you have not taught the material in the bienvenida - the visuals and context should help the students become more familiar with the structures. Tailor it to your needs - shorten it for time, include different material based on the unit, etc.

Gather birthday information and likes/dislikes during first week of school.
