Library Assignment Part 2 – Annotated Bibliography

Read the guidelines for creating an “Analytic Annotated Bibliography” on the library website (click on *Citing Sources*; then click *Creating an Annotated Bibliography*; read the description about Constructing an Analytical Annotated Bibliography).

The purpose of an annotated bibliography is to assess your research sources before you begin to write a paper. You should reflect on the scope, purpose, conclusions, and disciplinary perspective of each book and article. On the library website, you will find a list of components to include in your Analytical Annotated Bibliography:

- a citation for the text (in a citation style such as MLA, APA, Chicago, etc.)
- a brief description or summary of the text
- a brief analysis of the text's primary thesis, argument, or focus
- a determination on the accuracy or timeliness of the text
- a review of the author's credentials
- a prediction or description of the text's intended audience

Use the book and article that you chose previously as the two sources in your annotated bibliography. For this assignment, it is not necessary that these two sources fit perfectly together for a research paper although they should both be on your initial topic.

Annotation (1 book and 1 article): Citation in MLA format followed by a one paragraph (maximum one page) analysis
