

Use of Resources Report:

Moving beyond Circulation Statistics, Integrating E-Usage that Matters

Lanette Garza (lgarza1@trinity.edu)

The Process

Summer 2013: Collaborated with Library Administrators & Circulation Manager to discuss what E-Categories should be included in the report. Their feedback was gathered and research into suitable dashboards ensued.

Fall 2013: 1 Excel sheet was created to house all data for this report. The data includes 2007-present. A dashboard with sample data was created and feedback once again gathered

Spring 2013: Add appropriate users and levels of access to the dashboard platform

In Progress

Add the following counts to the dashboard:

- Streaming Media
- PDA triggers
- Institutional Repository
- EDS counts to the dashboard

Continued research into our EDS and how it may skew some data

Documenting the criteria used for top 15 databases to be used in the dashboard

The need for more consistent reporting standards

Determine dashboard users and their level of access
