

2 girls, Luna and Celeste are cute & gay together. There have been a series of non-violent attacks from a bird-creature as well as several violent but non-deadly attacks from a mysterious creature that renders its victims temporarily voiceless (empty mouth?).

L & C are partnered in a group project with Kaylie, Her boyfriend Brian, and his best friend Mike. ~~Mike~~ Kylie arrives late after being spooked by the bird creature. They decide to go "take care" of it. They follow black feathers into the woods. Once in the woods, the group splits up. The boys follow a path that leads them to a clearing that says LISTEN.

The girls find themselves in the presence of the weregrackle themselves. They find the were grackle in an old house, the door slams behind them, and they see it
